Commission économique pour l'Afrique

Expert Group Meeting Recommandations

Rabat
12 Novembre 2025

- **Fiscal reforms and digitalization:**

- Continue strengthening fiscal reforms aimed at widening the tax base and modernizing revenue administration.
- Accelerate the digital transformation of tax systems to enhance efficiency, transparency, and compliance.
- Foster inclusive fiscal policies by supporting financial inclusion, transparency, and green financing instruments such as green bonds.
- Share good practices and peer-learning experiences across countries to consolidate regional cooperation on domestic resource mobilization.

- **Prioritize the building of national technologies and innovation infrastructures:**
 - Prioritize the development of strong national technology and innovation infrastructures as a foundation for sustainable progress, rather than focusing solely on adopting existing technologies from elsewhere.
 - Build the necessary digital, research, and institutional capacities that will enable countries to adapt technologies to their unique contexts, foster homegrown innovation, and strengthen resilience.
 - Work on strengthening digital infrastructure and on how countries can generate greater value through the adoption of digital technologies

- **Strengthen Digital Trust and Fiscal Transparency:**

- Enhance the integration between data protection and public financial governance by establishing a unified *Digital Trust and Fiscal Transparency Framework*.
- Prioritize the enforcement of personal data protection and align it with fiscal digitalization efforts to ensure secure, transparent, and citizen-centric public systems.
- Institutionalize cross-ministerial coordination mechanisms to oversee implementation, monitor compliance, and promote ethical data use.
- Develop clear operational guidelines and capacity-building programs to accelerate adoption of anonymization, encryption, and AI-driven supervision tools, fostering public confidence and equitable participation in digital economy.
